Incident Narrative	Security Incident Report – Disturbance / Intoxicated Individual Upon arriving at the property, I, Officer [redacted] observed two individuals who appeared to be involved in a possible physical altercation near [redacted]. I approached the individuals and observed a resident pushing an intoxicated individual while telling him to return to his unit. I intervened and instructed the resident to step away, advising him that I would handle the situation. I then made contact with the intoxicated male to assess the situation and determine what was occurring. While I was speaking with the intoxicated individual, the property manager arrived and addressed him directly. She instructed him to go inside his unit, stating that his current behavior was unacceptable and that this was not the appropriate time to act in such a manner. The intoxicated male apologized and stated that he would return to his unit. However, the property manager reiterated that he needed to go inside immediately. The property manager further explained that the male had recently returned from a football-related gathering where a drinking game had reportedly taken place. Based on her statement, alcohol consumption may have contributed to his level of intoxication and behavior. The intoxicated male subsequently complied with the instructions and went inside his unit. After confirming that he had returned inside, I proceeded back to my patrol vehicle. The property manager then departed the property. No further issues were observed or reported during this encounter. I resumed my patrol duties.
